We added a collection of 16 kittens to gain experience. Added a new location vacation (at the end of the stage) that could help create penguin ski resorts. Every six hours, you're on vacation to give you an experience. Added to multiplier points for experience. Mods have been added for those with impaired color vision. User design has been improved in landscape mode. Removed unnecessary permissions. It doesn't require a lot of skills, but a few strategies can be involved. It's not one of those games where you can't win without paying. One flaw, very minor. It doesn't turn on when you turn on your iPad, but if you turn it around before you open the app, that's fine. Magnetic regions are my favorite but I like different physics of balls in different areas. The sound effects are very good and the graphics are simple but beautifully done. This is one of my favorite games of this classic genre. It's good to play a simple game without any gameplay restrictions (i.e. time waiting/buying/logging on to social media/inviting friends for another life!) and ads won't interfere or pop up mid-game. Praise to the developers! I will probably pay for developer awards for not badge me to spend money! ☺ I find I love this game for days or weeks. Then, I'm tired of it. Then after a while I find it again and go nuts trying to handle the harder settings. So every day is not a key game for me but it keeps my attention for a few weeks and is there when I find it again.
